Assignment 1115

Alright, this is it — time to put your ideas in writing.

For Submission

Write the first draft of your proposal. At a minimum, this first draft should include:

- An initial *Previous Work* section, describing the literature on which your project idea is based
- An initial *Statement of Work* section, describing the work that you are proposing

After submission, we will have the next week off due to the Thanksgiving holiday. I will provide feedback on this as soon as possible, so that you can continue working on the proposal in the two weeks leading up to the next class.

How to Submit It

Commit your draft to CVS under `/projects/cmsi670/proposal`. You should work off this version from this point on. Note how your LaTeX file should be using the same `.bib` file as your annotated bibliography (the one located directly under the `/projects/cmsi670` directory).

Extra Credit

You will receive extra credit if you also submit an initial version of your proposal presentation. Commit the file under `/projects/cmsi670/presentation`.
